## Overview

AXCESS™ for AXIOM™ Setup Software provides a familiar Windows®-based user interface that enables intuitive and fast configuration of the AXIOM high-speed bar code solutions product line.

## Get Started Quickly with Intuitive Setup Features

Use either the AXCESS Wizard (designed for first-time users) or the AXCESS Explorer (created for advanced users) to configure AXIOM and AXIOM-X readers without the need for onsite service. Simply connect to your scanner via the setup cable or the on-board Ethernet connection.

Specify valid bar code types, groups, and patterns. Pad or strip characters from the decoded string. Define your I/O—including built-in trigger and tach signals and up to four solid state relays. When complete, download your application settings to the scanner and you're ready to go.

## Comprehensive Diagnostics Assure Peak Performance

Comprehensive real-time performance indicators and vital statistics are provided

through a single screen, the AXIOM Monitor. Diagnostics include read quality, code quality, box information, a message monitor and 10 status indicators.

Log Viewer provides useful logs including counters, lasers, read rate, and messages.

This feature rich, user friendly combination of quick setup and at-a-glance diagnostics makes AXCESS Setup Software the perfect compliment for your AXIOM laser bar code reader.

## Drop-down Menus

Offers the Save/Retrieve Settings plus additional features like Advanced Setup, Compare Parameters, and Visual Keyboard (for user-defined message creation).

## AXCESS Explorer

The navigation list allows advanced users to quickly find the parameters they need to configure or modify.

Use the diagnostics features during normal operations to confirm AXIOM is functioning properly.

## Toolbar

These buttons provide instant access to the connect, save, retrieve, backup and restore functions.

## Active Window

Displays the next task as defined by AXCESS Wizard or any task selected from AXCESS Explorer. (Network Settings in this example.)

After completing the configuration of an active window, save the changes and proceed with the next step via either AXCESS Wizard or Explorer.

## AXCESS Wizard

First-time users will find the wizard easy to use as it steps through the configuration process from start to finish.

## Getting Help is Easy!

AXCESS provides complete online help. Simply access help at any time by:

- 1) pressing F1 for details on active window or 2) using the Help drop-down menu.

## Add, Remove or Edit Bar Codes in seconds!

Use Bar Code Setup to include new bar codes to your list. Or edit existing symbology parameters. A Code Settings window make it a snap!
