

MODULAR RFID

COBALT HF™ Rev 02

FEATURES & BENEFITS

Enhanced connectivity options for communication with industrial networks.

COBALT HF™ architecture including C-MACRO™ command software for easy integration.

HF 13.56 MHz Controller supports multiple RFID air protocol standards including ISO15693 and ISO14443A to work with many tag types and vendors.

Full range of compatible antennas support read/write range from 5 to 50cm (2-20").

Direct-mount antenna installation eliminates cabling restrictions.

Rugged M12 Connectors and industrial design assure protection from moisture and dust in harsh environments.

Easy to read LED indicators provide helpful diagnostics for power, RF signal, communications, and node values.

PROFIBUS Model Shown

Rugged, highly connected COBALT HF™ RFID systems provide easily integrated and economical solutions for Auto-ID on the factory floor. Dust and moisture protection assure years of reliable operation in harsh environments.

Connectivity options include serial communications, PROFINET™, PROFIBUS™, DeviceNet™, and TCP/IP to assure rapid integration with many factory networks.

25+ years of experience with RFID systems for manufacturing are behind every EMS system, supported by Datalogic around the world.
