Fametech 2011 Receipt Printer Brochure

A receipt printer is one of the most important components among the various POS Peripherals, as receipts are proof that customers have purchased their items legitimately. Most receipt printers come with an RJ11 socket with VCC +24V for cash drawer connection purposes. This enables both the printer and the cash drawer to share a single connection port on the POS terminal. Options such as auto cutter, printer-pass-through capability for customer display are also available.

The newly developed PRP-188 and PRP-250 are the milestone products of 2011 for Fametech Inc. The innovative receipt printers include an exciting breakthrough development in that the users no longer need to worry about choosing the corresponding interfaces to pair with their machines. The new receipt printers are all equipped with multi-I/O main boards that combine USB, serial and LAN connections onto a single board!

* The alarm buzzer PBZ-100 is released, please visit our website for more information.

<p>PRP-058 Mini Thermal Receipt Printer</p>  <p>Graphic printing capability Print head speed : 50mm per second Print head reliability : 50km Paper width : 57.5 ± 0.5mm Print column : 384 dots per line Halt-on protection from overheat : 60°C Character per line : 32 (font A) Dot density : 8 dots per millimeter</p>	<p>PRP-058C Compact Thermal Receipt Printer</p>  <p>Print method : thermal line printing Print reliability : 100 KM Print speed : 120 mm/sec Paper thickness : 0.06 - 0.08mm Paper width : 2-inch, 57.5 ± 0.5mm Print columns : 384 dots/line Interface Paralelle, Serial, LAN, USB Compatible with ESC/POS</p>	<p>PRP-076 Dot-Matrix Receipt Printer</p>  <p>Print speed : 4.5 lines per second Max lable width : 76mm ± 0.5mm Print density : 400DPL or 385 DPL Halt-on protection : 120°C Print head reliability : 5 million lines Paper width : 76mm ± 0.5mm Dimension : 260mm x 160mm x 132mm Weights : 1600g (without cable)</p>	<p>PRP-080 Durable Thermal Receipt Printer</p>  <p>Graphic printing capability Print method : direct thermal Print head speed : 180 mm/sec Print head reliability : 100km Print density : 576 dots/line or 8 dots/mm Cutter life span : over 1 million cuts Halt-on protection : 80°C</p>
